Application No. 09/781,718
Amendment A

OFFICIAL

Amendments To The Claims

Claim 1 (Original): A method for displaying text in a fixed-sized information box on a viewing screen, the method comprising:

- selecting a desired font size for displaying text messages that are displayed in an information box on a viewing screen;
- formatting a text message for display in the information box on the viewing screen according to the selected font size;
- determining whether a length of the text message is too long to fit in the information box based on the selected font size;
- displaying an amount of the text message that fits in the information box based on the selected font size; and
- automatically scrolling through any remainder of the text message.

Claim 2 (Original): The method of claim 1, wherein when a last line of the text message is displayed, the text message continues scrolling from a beginning of the text message.

Claim 3 (Original): The method of claim 1, wherein a selection of available font sizes is preset.

Claim 4 (Original): A system for displaying text in a fixed-sized information box on a viewing screen, the system comprising:

- a set-top box in electrical communication with a viewing screen;
- an information box that displays text generated from the set-top box on a portion of the viewing screen;
- a text message containing program information; and

Application No. 09/781,718
Amendment A

a font size selector for selecting a font size for the text message;
wherein when the set-top box determines that the text message does not fit within the information box based upon a selected font size, the set-top box causes the information box to display only an amount of the text message that fits within the information box, and causes the text message to scroll within the information box.

Claim 5 (Original): The system of claim 4, wherein when a last line of the text message is displayed, the text message continues scrolling from a beginning of the text message.

Claim 6 (Original): The system of claim 4, wherein a selection of available font sizes is preset.

Claim 7 (New): A method for displaying text on a screen, comprising:
acknowledging a chosen font size for displaying text messages in an information box on a viewing screen;
formatting a text message for display in the information box on the viewing screen according to the chosen font size as acknowledged;
determining whether a length of the text message is too long to fit in the information box;
displaying an amount of the text message that fits in the information box;
and
scrolling through any remainder of the text message without user interaction.

Claim 8 (New): The method of claim 7, further comprising:
continuing to scroll from a beginning of the text message when a last line

Amendment A

of the text message is displayed.

Claim 9 (New): The method of claim 7, further comprising:
providing a preset selection of available font sizes.

Claim 10 (New): The method of claim 7, further comprising:
implementing a scrolling function; and
altering the scrolling of the text message according to the scrolling
function.
